

Team TreeHouse

Team Lead: [Abhinav Selvaraj](#)

Members: Breanna Chi, Ken Ho, Prabhleen Bagri

Project: Who's That Pokemon

Github Repository: <https://github.com/wen1225/whos-that-pokemon>

Job Assignments(2/27 - 3/5)

- Abhinav: Populated database with 100+ Pokemon and added audio functionality
- Breanna: Currently working on implementing the ending game over page using React
- Ken Ho: Rewrote the README based on class requirements and developed timer functionality. Currently adding stop/pause functionality to timer buttons.
- Prabhleen: first page UI + components

Milestones:

1. Milestone 1, 2/12 (Completed): Finalize tech stack, setting up development environment, and wireframe for front-end UI.
2. Milestone 2, 2/26 (Completed): Complete basic CRUD database operations, Starting home page UI, and begin single player functionality

Tasks to be continued:

3. Milestone 3, 3/12 (In Progress): Continue working on single player functionality, and finalize frontend design.
4. Milestone 4, 3/26 (Tentative): Continue single player functionality, continue developing frontend
5. Milestone 5, 4/9 (Tentative): Finish single player functionality, start multiplayer functionality
6. Milestone 6, 4/23 (Tentative): Completed working prototype
7. Milestone 7, 5/7 (Tentative): Full deployment(including multiplayer functionality)

Technologies

Frontend: HTML, CSS, React

Backend: Java, Spring Boot, MongoDB (database)

Version Control: Git/Github
