Team	Feedback	Response
Professor	Implement Admin Permission	We decided not to implement this feature as its not needed for our game, but we think it's a good idea if we decide to store user information
Professor	Implement Login feature	Since each round is being reset, we don't find a login feature to be necessary to keep our codebase light. However, it is a good suggestion when we decide to include a database to store user information and log the number of users playing our game!
ThriveToday	Filter Pokemon matches by region or generations	Workable and good to have in the future.
ThriveToday	Ranking for fair matchmaking	Since we couldn't get our multiplayer implemented, this feature will be put on hold
